

DIDSBURY PIONEER

VOL. XXX, No. 20

DIDSBURY, ALBERTA, THURSDAY MAY 18 1933

\$2.00 per Year. 5 cents a copy

Town Council.

A meeting of the town council was held Monday evening, with Mayor Chambers in the chair and all councillors present.

The secretary reported that four appeals had been made against property assessment and one appeal against business tax assessment. It was decided to hold a court of revision on Monday June 5th.

Two applications for old-age pensions were approved, and an application for increased pension was also approved.

It was decided to open the auto camp for the season and arrangements were made to clean up the grounds and put the building in shape.

The renewal of restaurant licenses for Mr. J. A. Russell, Mr. H. W. Chambers, the American Cafe, Club Lunch, and Imperial Cafe, were approved.

The final date for allowing the discount on business taxes was set at June 30th. A discount of 5 per cent will be allowed on all business taxes paid on or before that date.

Celebrate Silver Wedding Anniversary

The home of Mr. and Mrs. Chas. Mardon east of Didsbury was crowded Thursday afternoon May 11th 1933, when ladies of the Lone Pine Women's Institute, and many neighbors and friends met to honor Mr. and Mrs. Mardon on the occasion of their silver wedding anniversary.

The Women's Institute took the occasion to present their hostess with a set of silver knives. Numerous other gifts were also tendered as tokens of friendship from the people of the community. Mrs. Mardon is one of the charter members of the Institute, and the president, Mrs. Woods in her speech of presentation congratulated Mrs. Mardon on her faithfulness to the Institute.

The large dining-room table was covered with many dainties, and following the cutting of the wedding cake by Mrs. Mardon, ice cream was served.

Community singing was enjoyed by all present and before leaving, the guests wished Mr. and Mrs. Mardon many more happy years.

LOCAL & GENERAL

Mrs. Grant, of Edmonton, visited her daughter, Miss Irene Grant over the weekend.

Mr. Adam Logan, secretary of the town of Olds, was a business visitor in Didsbury last Friday.

New Arrival of Hats—With large brims and sizes. Also Voile Dresses—Mrs. Wilson, Main St.

Grandma Hunsperger celebrated her 85th birthday on Sunday at the home of her son, Mr. Allen Hunsperger.

The Atlas Lumber Co. Ltd. is supplying material to Mr. Norman S. Clarke, who is adding a sun parlor to his farm home west of town.

Mons. Chapter, I.O.D.E. will hold a "Tag Day" on Saturday May 20. "Buy a Violet and Help Mons. Chapter."

Correction: "Interesting Case" (last week's issue)—"250,000 ft. of lumber" should have read "25,000 ft. of lumber."

The C.G.L.E. girls are holding a Bluebird Tea on Saturday May 27th from 3 to 6 p.m. in the Louder Block. Sale of candy and home cooking. Keep the date in mind.

Miss M. Sandstead returned to her duties at the telephone office on Monday after being absent for several weeks on sick leave.

This week a bunch of local fishing experts are stocking up with all the allurements for trout and grayling. They figure on great sport, and Ward at least is making big promises.

Mrs. H. E. Pearson attended the convention of the Women's Institute held at the Palliser Hotel, Calgary, as representative of the Mountain View W.I.

Mr. Gray Sharp, who was successful in graduating in electrical engineering at the University of Alberta, received his degree at the convocation held at Edmonton on Tuesday.

Mr. and Mrs. W. Rupp, Miss Eva Rupp and Mrs. H. C. Renne attended the convocation at the University of Alberta on Tuesday. Miss Rupp was presented with her B.A. degree at the convocation.

Efforts are being made to organize a band in town and it is hoped that the organization will be completed by fall. A number of years ago a complete set of instruments was owned by the town, but only a very few pieces are on hand. It is reported that several of the instruments are scattered around the country and persons having any of these instruments are being asked to return them.

Salvation Army Will Present Play

The Young People of the Calgary Salvation Army came to the Opera House on Saturday evening May 20 to present a biblical drama, "The Master."

When presented in Calgary the drama was well received and excellent reports regarding the play have been voiced.

In addition a humorous dialogue, elocution numbers and several band selections will be given.

The entertainment is given under the auspices of Zion Evangelical Church Young People's Society and tickets can be obtained from any of the members. Adults 25 cents and children 15 cents.

Protest Closing Of Radio Station

A protest against the closing of CKLC, Red Deer's radio broadcast station, will be made by the Red Deer Board of Trade to the radio commission in the course of the next few days, the matter being brought up at the Monday night session of the board and coming in for considerable discussion.

Support of other towns in the district, including Stettler, Camrose, Lacombe, Nordberg, and Rocky Mountain House will be sought.

National I.O.D.E. Convention.

The National Convention of the I.O.D.E. of Canada will be held this year in Alberta, taking place at Edmonton during the week of May 25th.

Mountain View Sets Mill Rate

Setting the mill rate for the year was the most important business of the council meeting of the Mountain View municipality held at Olds on Saturday afternoon.

The secretary-treasurer presented the estimates and the mill rate was set at 7 mills. When the discount of 5 per cent, which will be allowed on taxes paid on or before December 15th, is taken into consideration, the rate will have been reduced approximately one mill.

The consolidation of taxes was discussed and it was pointed out that the discounts on arrears, under the scheme, would amount to about \$7,000 on municipal taxes; \$5,000 on school taxes and \$1,700 on provincial taxes.

While tax consolidation is not yet in effect, the council is allowing the discount provided in the act on all arrears of taxes paid. The secretary stated that a good many of the taxpayers are taking advantage of this concession.

The secretary was instructed to ask the C.P.R. to widen the Rollard crossing, a half-mile north of Olds, to conform with the grade.

An application for old-age pension was approved and a number of bills were passed for payment.

The sermon subject next Sunday morning at Zion Evangelical Church will be, "The Need of Greater Devotion," and in the evening, "The Young Man Jesus." The evening service will be under the auspices of the Young People's Society of the church.

Why Canada's Trade Declines.

Official figures of the trade of Canada for the fiscal year which ended on March 31, 1933, issued by the Dominion Bureau of Statistics at Ottawa, are of interest these days to a far larger group of citizens than those who usually make a study of statistical information as a guide to the trend of national and international affairs. Since the stock market crash of October, 1929, and the steady fall in prices of all primary commodities the world over, with all the concomitant evils of depreciated money values and violently fluctuating exchange rates, the farmer, laborer, store clerk, has taken an increasing interest in economics and eagerly reads all information on the subject available to him. The average man and woman has been undergoing a real education in the fundamentals which underlie national and international business relationships, and they have come to appreciate the fact that these things very intimately affect themselves and their families.

For this reason the figures referred to are of more than passing or mere statistical interest, because, in concrete form, they reveal just why it is that business of all kinds throughout Canada is so sadly depressed today, with unemployment general, and governmental relief services necessary for the maintenance of thousands of families.

The year preceding the crash of prices in October, 1929, was the biggest trade year Canada ever experienced. The official figures of imports and exports tell the story just as the same statistics for the succeeding years down to the present time tell what has since taken place. For the information of readers of this column the figures for the past five years are here given, from the highest in the history of the Dominion in 1929 to the lowest since 1915, the year in which the Great War broke.

Fiscal Year ended March 31	Imports	Exports	Total
1929	\$1,265,479,001	\$1,389,809,075	\$2,655,288,076
1930	1,248,273,282	1,144,958,079	2,393,231,362
1931	990,612,655	817,028,018	1,807,640,673
1932	758,517,741	587,565,517	1,346,083,258
1933	408,213,972	480,821,297	889,035,269

These comparative figures disclose the fact that Canada's trade is now only one-third what it was five years ago. It is because of that fact that all business is depressed, its flow curtailed, and under way, tens of thousands are unemployed, railway equipment is largely idle and the companies in financial difficulties, government revenues are shot to pieces, and public debts and taxation of the people steadily increasing.

The loss in the total volume of trade is, of course, not quite as large as these dollar values of trade indicate because the value of all commodities is less today than in 1929; nevertheless the decline is startling. Furthermore, this decline in our international trade, import and export, is reflected immediately, and in practically the same proportion, in our internal trade between provinces and communities. The total falling off in trade is, therefore, enormous.

What occasioned this tremendous loss? Scores and hundreds of reasons are advanced, and a goodly number of them may be contributory or subsidiary causes. Many say the chief responsibility lies in the competitive capitalist system and in the prevailing monetary and banking systems. But it was under these same systems that the trade of Canada and the world was carried on prior to and during 1929 and brought to the peak indicated by the figures given above. The monetary system worked while the trade of the country was moving and increasing, but when trade was checked and gradually killed off, there was not the same demand for credits, and credits began to dry up because that security which has back of all credit was fast disappearing. Let trade be revived and prices will again rise, credits be called for and be forthcoming, because, naturally resulting from increased and profitable trade would again be in evidence.

The question then is: What has so largely depressed the trade of the world, Canada included? Despite the many and often conflicting reasons advanced, the true answer is not far to seek.

The Great War destroyed millions of lives, maimed more millions who became pensioners of the State, destroyed tens of billions of property, incurred billions of debt upon the nations, upon which hundreds of millions in interest charges have to be paid annually. Not only these things, but the war left an even more disastrous trail of bitter feelings, suspicions, and narrow nationalistic views in its wake. The nations of Europe, each and every, perhaps more than ever, and continue armed to the teeth. But the war has taught them one lesson, and that is that food supplies for their populations are just important, more so, in fact, than arms and munitions. Nations surrounded by enemies became convinced that they must become more self-contained if they are to survive in any future war.

So France turned its magnificent and highly profitable vineyards into less profitable but more essential wheat fields. Germany abandoned less essential farms of production to grow wheat. Italy did the same thing, giving large State subsidies. Russia embarked on its ambitious five-year plan; other smaller nations followed the same course. To encourage these nations imposed terribly high tariffs, prohibitory tariffs, against other countries. Instead of importing wheat, which they could have done much more cheaply and in every way more essential than wheat, they sold themselves, they stopped doing so. Producing largely for themselves, they had less of other things to export and because other countries Canada included had lost their markets in Europe, which in turn sold their surplus products, they had no money wherewith to buy in these markets.

Therefore, because every export by one country is an import by some other country, and every import by one export by another, and with all determined to reduce imports to the vanishing point the inevitable automatic effect is to reduce exports to the same point. Thus is the trade of the world being destroyed.

That is the answer to the seeming riddle of the depression. It is not the existing economic system, including monetary systems, that is at fault. It is "Fear," fear of war. Until that fear is removed and confidence re-established, there can be no restoration of national or international credit, trade will continue to languish and grow less and less; the world depression will continue.

Will Shoulder Burden

Canadians Paying Heavy Taxes But Will Not Tolerate Extravagance

Jack Canuck for years has travelled at the equanimity of John Bull in crises, and particularly his sang-froid in accepting heavy impositions of taxes. The old gentleman has invariably shrugged his shoulders, smiled, lightened his belt and turned to the work in hand, tackling the most immediate problem with a nonchalance that was amazing to others.

Now Jack Canuck is getting a taste in a tax way of what to John Bull has become common. In other words, Canadians have come to realize that those who are earning and spending must be prepared to pay more into the coffers of the country to improve its financial position.

The Rhodes budget is heavy. It hurts. But when one is hurt he is apt to take a deeper interest in the reason for that condition. Hence Canadians will in the future see governmental expenditures with a keener eye. They are willing to pay, willing to meet their just obligations, and will shoulder tax burdens like John Bull for the national good, but they will not tolerate extravagance or political wire pulling where public funds are directly or indirectly involved. —Ritchie Record.

Cattle Shipments Active

Fair Demand In Britain For Choice Canadian Cattle

There's a fair quantity these days of what may be regarded as the "roast beef of Old England" being served to the British people in their own country but which a short time before was prime young steer in Canada. With the outbreak of live cattle from the Dominion to the British market are particularly active this year. From January 1 to March 23, 1933, a total of 7,563 head were exported from Canada to British ports, an increase of 7,454 compared with the corresponding period in 1932. With the outbreak of investigation on the St. Lawrence it is expected there will be heavy shipments from Montreal to fill large orders already received from buyers in Britain.

Opinion Of Dirigible Expert

Eckener Thinks Break Was Cause Of Akron Disaster

Dr. Hugo Eckener, dirigible expert, discerned the theory that a storm had caused the Akron tragedy, and said in his opinion, from reading the reports of the inquiry, the crash was caused by a break in the big ship in the airplane carrier room.

Dr. Eckener said he always had considered the room, in which fighting planes were stored, a weak point in the Akron's framework. His comment came following New York reports tracing the Akron disaster to broken ribs in the huge dirigible.

Unbreakable Milk Bottle

Has Been Developed In Pittsburgh From Wax-Like Material

An unbreakable milk bottle has been developed in Pittsburgh. The bottle is first molded in one piece from cellulose to the shape of the standard half pint, pint, and quart glass containers. It is then impregnated through its entire wall thickness with a research creation, "opax," a colorless and odorless wax-like material. The bottle will not soften under constant exposure to water or heat, and it is said, and will pass through present types of filling and capping machines.

Secret Rediscovered

Dr. Francesco Zamboni, of Trieste, Italy, claims to have rediscovered the process used by early victim makers who were able to produce the deadening and sweetening effect of strangled instruments. He says that a resin obtained from plants that grow only in Persia furnished the base of the secret varnish used by Italy's classic victim makers.

Record Of Flying Squad

Arrests made by the Flying Squad of Scotland Yard last year numbered one in 120, and the prisoners were violent, and 120 of them carried firearms. The strength of the Flying Squad is less than forty.

W. N. U. 1901

Large Landward Movement

Many Families Have Been Placed On The Land Through Colonization Work

Between October 1, 1930, and January 31, 1933, the Canadian Government Department of Immigration and Colonization, the Canadian National Railway, and the Canadian Pacific Railway, working together, have been instrumental in placing upon farms in Canada a total of 10,733 families. These were families already resident in Canada. On the basis of five to the family this means 53,665 persons. This family settlement was confined to those who had sufficient capital to establish themselves on the land.

In the same period 23,253 single men were placed in farm employment. Adding these to the families, the impressive total of 76,918 persons actually placed on the land is reached. Simultaneously with this movement, land settlement activities were being carried on by the Provincial Governments. In one year—1931, the Government of the Province of Quebec placed 5,994 families in farm settlement, and in the three years 1930, 1931 and 1932, the Government of Alberta granted 19,222 home-lands to residents of that province. Similar activities were carried on by other provinces. In addition, there was a large landward movement entirely on the initiative of the individual settlers themselves.

U.S. Taxes Heavy Too

Comparative Figures Given By San Francisco Paper Are Startling

Tax money for 1932 could employ, at the \$15-a-week rate paid by relief agencies, no fewer than 17,948,711 men for a whole year.

The combined annual cost of our Army, Navy and Air Force equals less than three weeks' tax impositions for 1932.

The tax burden averages \$300 for each family in the land.

If all the paper currency in circulation throughout the country were added to all the gold, we would still owe the tax collectors as much more again and more.

This year's taxes could pay off every farm mortgage in the land, with enough left over to donate almost a thousand dollars to each of six million farmers.

The total salaries and wages being paid this year by two hundred thousand manufacturing establishments to some eight million executives and employees will not match the Nation's tax claims.

Thirty-six Panama Canals could be built with one year's tax receipts. The Argonaut, San Francisco.

Holding "Enjoyment Week"

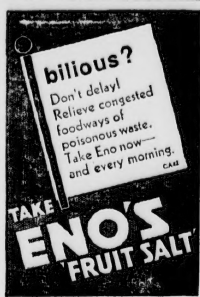

Lord Mayor Of London Sponsors Seven Day Festival

Under the auspices of the Lord Mayor, London is holding an "Enjoyment Week," starting May 27 and ending June 2, with the proposition in Gilbert's "Milk and Honey" as a general rejoicing and a grand display of fireworks on June 2, the King's birthday.

"A week of festival," says the Lord Mayor, "will undoubtedly have the effect of getting the people to take the brighter view of the situation. The situation is by no means as bad as is supposed in some quarters, either," add his lordship.

Hardly secondary to this aspiration though is the desire to further popularize London as a tourist centre. It is hoped the enjoyment will include a regatta procession and a gala demonstration.

One thing about sunsets is that small towns have just as big ones as the large cities, and a dangled let easier to see.

Delayed Taking Out Patent

Inventor Of Moving Picture Camera Lost Millions and Died Penniless

A recent report from the Surrogate office showed that Jean A. Le Roy, inventor of the motion picture projection machine, died penniless. The millions of dollars that were rightfully his but not legally his, went to others because he neglected to patent his invention soon enough.

An ironical feature is that Le Roy's last few years were spent in poverty. Paralyzed, he subsisted largely on the bounty of friends. All he had at his death was reputation but that doesn't pay doctors or food bills. And that slender sustenance came to him only late in life.

For many years, the origin of the motion picture camera remained shrouded in mystery. There were many claimants. An impartial investigation finally allotted the honor of being the father of the motion picture industry to Le Roy. But it was not until two and one-half years after he had perfected the first projection machine that Le Roy got the idea he ought to patent his invention. Then, he found he had been six months too late.

Le Roy's experience is not novel in the history of invention. He lived in an age when the commercial idea was not so prevalent as now. He gave his first public exhibition of moving pictures in 1894. His statement on why he never patented his machine expresses, perhaps better than ever before, how so many inventors lived to see others reap the enormous profits of their genius. Said Le Roy:

"I didn't patent my invention because I didn't realize what I had. That is the real truth. It was unfortunate for me that my knowledge of patents and patent law was exceedingly meager. Like the average inventor, I centered my interest in the invention itself, to the absolute exclusion of everything else." From Zita's New York.

Mystifying Magic

New York Audience Sees Strange Things At Benefit Show

An audience in a New York theatre applauded the other night as a woman "burned to death" before their eyes. They asked questions of a gleefully skulld and marched forward to have their pockets picked. One man even smiled as his new derby hat was used as a mixing bowl for pancake batter.

These strange events took place during the annual benefit show of the Society of American Magicians.

The audience relished Joe Kelsa's derby hat trick and grinned delightedly as the borrowed derby was filled with butter, which changed mysteriously into six hot pancakes, leaving the derby steaming but unburnished.

Chestnuts, almonds, filberts, walnuts, pecans and other varieties of nuts have been successfully grown in the Okanagan Valley, British Columbia.

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes:—"I was bothered with palpitation of the heart and my nerves were so bad I could not sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Vancouver, B.C.

Canada Has Become One Of The Most Popular Playgrounds On The North American Continent

In recent years Canada has become one of the most popular playgrounds of the North American continent and millions of tourists visit this country annually, in search of recreation.

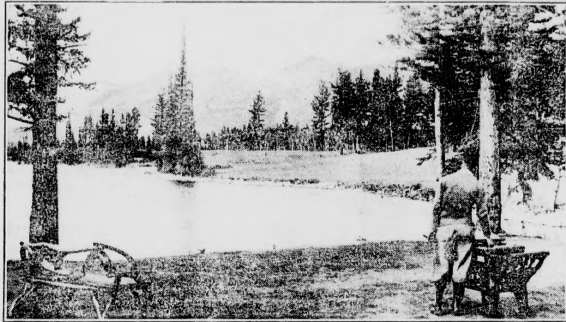

Canada possesses an extensive system of modern highways, with good secondary roads linking together the main routes of travel. Excellent train services are in operation be-

tween the principal cities, while steamship lines connect lake and ocean ports. Every class of travel accommodation is available, from tourist camp to luxurious hotel. Our larger Canadian cities possess some of the finest hotels in the world and the majority of smaller cities and towns have modern establishments which cater to the travelling public.

Within reasonable touring distance of the main centres of population, recreational attractions of outstanding merit are to be found. Lakes and rivers well stocked with fish, hunting areas of vast extent and camping grounds in their natural state, are only a few of the many features which make the country a popular vacation land during all seasons of the year. An atmosphere of old France permeates Quebec and the Maritimes, while Ontario and the

adventurous. Games and equipment may be rented and guides are available in practically all districts. Subject to reasonable fire prevention regulations the canoeist, camper, camera hunter or student of wild life, may come and go, unrestricted, through the country's vast forested area.

Canada's fishing waters, on account of their extent and diversified

nature, provide an exceptional range of sport for the angler. The game fish include, salmon, brook trout, lake trout, bass, muskellunge, pike, pickerel, grayling, steelhead and tana. Intelligent protection and constant restocking help to keep up the supply of fish in the popular districts while in the more remote areas there are still plenty of virgin waters. The cost of fishing licenses is moderate and the open seasons are long.

Canada is well supplied with golf courses and new ones are being built in every province. No city is without at least one golf club and most of the large towns and popular summer resorts have courses. Tennis is also popular in all parts of the country. A number of specially prepared booklets on Canada's recreational attractions and automobile road maps indicating the main connecting highways

Western provinces have much to offer by way of historic sites and monuments.

For those who desire a vacation close to nature, a canoe trip is ideal and Canada's extensive system of rivers and lakes offers a limitless choice of route and type of trip. For the novice there are many trips close to civilization, which may be taken with comfort and perfect safety, while untripped and even unexplored regions challenge the expert and the

ways between one province and another may be obtained free of charge by adults from the National Development Bureau of the Department of the Interior, at Ottawa. The Bureau also has on file information concerning practically all phases of recreation in Canada, which will be gladly provided, upon request. In order that the most complete information may be supplied it is desirable that applicants be as specific as possible as to the area in which interested.

A new wood pulp material has properties similar to cellophane and is being used in manufacture of toys.

He: "I don't know whether to be a barber or an author."
She: "Toos for U? Heads or tails."

W. N. U. 1901

Boy Scouts

Two Hundred and Fifty-One Medals Are Awarded For Life Saving Work

Since the inauguration in 1921, of awards to Boy Scouts in Canada, 251 medals have been given for life saving or notable work in a serious emergency, and 49 certificates of merit and 25 letters of commendation for valuable service in lesser emergencies. The medals include 11 bronze crosses for life saving at grave personal risk, 108 silver crosses for life saving at serious personal risk, and 120 gilt crosses for life saving without serious risk, or other notable work in an emergency.

Wheat Production In The Western Provinces Is Said To Be Rapidly Approaching Peak

Require Special Care

Precautions Necessary To Keep Bees From Drifting In Spring

Bees know their home by location only, but when they have been forcibly confined to their hives for long periods, location is forgotten and old landmarks must be learned anew when the next flight is taken. Bees that have been wintered in cellars or dug-outs are, as a rule, badly disorganized when taking their first flight in the spring, unless special precautions are taken to prevent an immediate flight when removing them from their winter quarters.

If weather conditions are such that the bees may fly freely when they are returned to their summer stands, they will rush pell-mell from their hives without "locating" themselves, with the result that many may drift to other hives when the flight is over. Drifting usually causes the strong colonies to become stronger and the weak colonies weaker.

To prevent drifting, indoor wintered colonies should be moved from their winter quarters when the weather is suitable for an immediate flight, or late in the evening after all light for the day is over. This will reduce the excitement and enable the bees to become acquainted with their new location gradually.

Placing colonies too closely together encourages drifting, especially if the hives are all uniform in appearance. But if several colonies are in one direction, and there are no guiding marks for the bees to follow. The colonies should be at least six feet apart and even then some drifting may occur. Bees that have wintered outside have already learned their location, but if several colonies are standing together in one case, considerable confusion and drifting may be caused when removing the cases in the spring, especially if the hive entrances are close together. The cases are best removed and the colonies spread apart when the bees are confined to their hives because of bad weather.

Drifting is a spring problem, for once the colonies become established, little or no drifting occurs. If drifting can be prevented when returning the colonies to their summer stands, later work of equalization will be avoided.

Canadian Labrador Has Thirty Small Villages

Medical Missionary Gives Interesting Talk On Community Life

Life in the Canadian Labrador with Harrington hospital as the centre of a community was described at London, Ontario, recently by Dr. Donald Hodd, now on tour, and for seven years in the hospital staff. In the Canadian Labrador there are 30 small villages, education, although controlled by the provincial department of education is still backward and there are few qualified teachers most of the teaching being done by the young people of the district who have had only elementary schooling.

"The hospitality of the people is wonderful," Dr. Hodd said. "They may only have bread and a baked apple, but it is shared joyfully with their guests." Difficulties of an insufficient supply of fresh water were cited. There are no wells, and the granite formation of the rocks, the oldest known, denies all water. At Harrington they are dependent on the rainy season for their water supply. As far as bales are concerned, old overcoats, past all other possible use are welcomed. These are made into "shoes" for the dogs who suffer from bleeding feet caused by continual trotting on the ice.

From Various Walks

At one training college for candidates for the Church, the students recently included a rear-admiral, retired, two policemen, two Army officers, two farmers, and a dancing master. Out of the forty-nine candidates, only twelve had come direct from a University.

The future of the Canadian export trade in wheat is discussed by Dr. D. A. MacGibbon, professor of political economy, University of Alberta, in a paper published with numerous graphs in the University of Toronto studies in history and economics. His conclusion is that Western Canada is destined long to remain an important cultivator and exporter of wheat, but that we are approaching more closely than people suspect the peak of production and export of wheat.

In 1928 Western Canada harvested approximately 545 million bushels of wheat, and sold to the world wheat and wheat flour valued at \$428,500,000. In 1929, when Canadian wheat was practically withheld from the world's markets, exports shrank one-half. In 1930 carryovers or surpluses of wheat, the great fall in prices of wheat, and the financial difficulties of the wheat pool appeared as serious problems, and in 1931 there occurred the disastrous drought in the southern half of Saskatchewan and in adjoining parts of Alberta and Manitoba.

Dr. MacGibbon calculates that Saskatchewan may reach a maximum yield of about 495 million bushels of wheat, or an increase of \$8 million bushels. By a similar calculation Alberta may reach 211 million bushels, an increase of 40 million bushels. Manitoba is reaching a stabilized position. Here the average is a possible maximum wheat crop of about 670 million to 700 million bushels in Western Canada. But after Saskatchewan and Alberta reach the point of maximum production there will be a considerable decline just as there has been in Ontario, Manitoba, Minnesota and Iowa.

Between 1924 and 1928 Canada exported on the average 262 million bushels of wheat. The rapidity with which the remaining land suitable for agriculture is settled will largely determine whether Canada will ever substantially better this average. Personally, Dr. MacGibbon does not expect much increase in exports. On the other hand he sees no ground for believing that average exports will fall below 200 millions for many years to come. The late Professor Meyer in his paper read at the British Association in Winnipeg, 1909, estimated wheat for export at 232 million bushels. Dr. MacGibbon thinks that, even with this quantity, wheat would probably continue to be our most important article of export.

It may be that the authorities quoted have not made full allowance for the as yet unoccupied wheat lands of the Peace River Country and the North West Territories. Even in the settled portions of the Prairie Provinces millions of acres are as yet unsettled. There is also the fact that a new type of hardy, rapidly maturing wheat is constantly pushing the wheat line further north. On the other hand the progress of mixed farming will operate to curtail the acreages sown to wheat, even though the present proposal to limit wheat planting internationally comes. (Byington—Toronto Mail and Empire.)

Cease Salvage Operations

British Export Has Lost Money At Scapa Flow

Scapa Flow, desolate bay in the Orkney Islands and scene of the nightst salvage operation ever undertaken is soon to return to its normal aspect after ten years of bustling activity.

F. E. Cox, Britain's salvage expert, who has succeeded in raising 32 of the 42 warships of the German grand fleet, which were scuttled shortly after the Armistice, has decided to abandon the remaining ten vessels still at the bottom of the bay.

Until the beginning of the depression it seemed that he would make money on the deal, but with the slump in prices for scrap iron and copper he finds he has lost \$100,000 on the \$2,500,000 deal with the authorities.

A tourist highway will be built across the Hawaiian Alps.

Canadian Gold Output

Returns For January Show Slight Reduction Over Last Year

Canadian gold production in January last totalled 233,456 ounces, as compared with 266,719 ounces in the preceding month, and 233,826 ounces for the corresponding month in 1932. Ontario led the provinces for the month with 171,878 ounces. Quebec was next with 33,041, British Columbia produced 17,894 ounces, Manitoba 10,491, and Nova Scotia 241 ounces.

Defends His Pens

Benjamin E. Hubay, watchman at the Denver post-office, resents the declaration that post-office pens are not what they should be. Hubay, who has served under Republican postmasters for many years, declared that he changed all the pen points in the Denver post-office twice daily, and that the present Postmaster-General James A. Farley, did not originate the practice.

Final links in the China-European air line are being inaugurated.

Transplanting Young Evergreen Trees

Success in transplanting young evergreens is only obtained by following directions exactly. Experience in this work has revealed that their roots are very susceptible to damage from exposure to air, clay subsoil and contact with manure.

From the time a young spruce tree is lifted until transplanted, the roots must not be allowed to become dry. If the roots are not covered with soil they must be kept immersed in water or wrapped in moist material during the short interval.

The new hole should provide plenty of room for the roots. Some surface soil should be placed in the bottom of the hole before transplanting, to avoid contact with the cold clay. No manure or fertilizer should be used with evergreens at time of transplanting.

The young tree should be placed in the hole quickly and roots covered with surface soil immediately. If the soil is dry a little water should be added, but must not be made too wet. Soil must be firmed around the roots and continued until the hole is filled. It must be remembered that the tree should be in the position required after the hole is filled. A surface application of water can be added after transplanting is completed. The tree should be planted a little deeper than it originally was, and no pruning or cutting back of the young tree should be done.

Spruce can be readily transplanted in the fall after freeze-up, when large trees can be used more conveniently with a frozen ball of earth around their roots.

Satisfactory results in transplanting evergreens at the Dominion experimental station at Scott, Sask. have been obtained by following the above procedure. Young evergreens transplanted twenty years ago are now outstanding in their size and beauty. Young trees transplanted in recent years indicate that the same success will be obtained.

G. D. Matthews, Supt., Experimental Sta., Scott, Saskatchewan.

Dominion Milk Inquiry Likely

Appointment of a commission to conduct an inquiry respecting milk products likely will be recommended by the parliamentary milk probe.

The commission, it is understood, would investigate thoroughly the financial set-up of dairy companies in many parts of Canada. A further phase which would be the subject of the fullest inquiry is the spread between producers' and consumers' prices for milk.

The report of the committee, it is understood, considers that the spread is too great so far as dairy companies are concerned, and finds that these companies are making enormous profits. Producers, the report finds, are not receiving an adequate amount of money for their milk.

Value of Cooling Milk Explained

It is a simple matter to control bacterial growth in milk. At 40 degrees F. there is practically no change in the number of bacteria at the end 24 hours; at 50 degrees the number increases fourfold and at 60 degrees nearly a hundred times as many as at the start, says the Dominion department of agriculture.

Milk should be cooled as promptly as possible. Freshly drawn milk contains a substance known as "lactenin," which is able to restrain bacteria for a certain period. If the cooling is delayed the effect soon passes off; by prompt cooling the lactic effect may be extended even to 24 hours or longer.

The Didsbury Dairy has installed a cooling plant that ensures the milk and cream being kept at an even temperature of 40 degrees at all times.

A MARK OF DISTINCTION

THE DUNLOP "FORT" TIRE boasts a more distinguished patronage and a greater reputation for dependability than has ever been accorded to any other tire.

To families of title and prominence in Great Britain—as in every country where it has been introduced—the "FORT" Tire is more than a tire. It is a symbol of correctness—an essential to the fine car.

The "FORT" Tire has achieved this dominance because cost was not made a restricting factor in its design and construction. Considerations of perfection alone ruled. Consequently the "FORT" Tire is a higher priced tire—and the most economical.

Now made in Canada in a limited number of sizes, the "FORT" is the leader of a complete line of DUNLOP Tires which offer you unsurpassed value in every price range.

Alberta News Letter.

Homestead Entries.

The provincial lands department
during the first quarter of 1933
issued 534 homestead entries, there
being 156 January, 187 February
and 191 March. In the financial
year ending March 31st 1933 there
were 3,499 entries in all. Entries
for April were 156, of which 28
were granted to women.

Unemployed Become Gold Hunters.

Equipped with well-constructed
"grizzlies," for washing gold, some
70 unemployed of Edmonton will
enter the gold hunting business along
the River Saskatchewan within the
next week or two. The equipment
has been constructed under the
supervision of the men themselves.
One outfit will require 30 men to
operate, and there are other units
requiring six men each. The new
equipment is much advanced over
the old-fashioned "grizzlies."

Alberta Fire Losses.

Fifty per cent. fewer deaths and a
smaller property loss by well over a
half-million dollars, as compared
with the preceding year, are charged
up against fires in Alberta during
1932, according to the annual report
just compiled by the provincial fire
commissioner's office. The death
list numbered 12, against 24 in 1931.
This is the smallest number on record
in any one year. Nearly all the
deaths caused by fire were of children
under 15 years of age. There were
1,937 fires of all kinds last year,
causing property loss of \$2,493,491.
For the preceding year the figures
were 2,067 fires and \$3,131,729 loss.
From 1920 to 1932, inclusive, total
property loss from fire in Alberta
was \$33,067,123.

University Feeders' Dar.

The 12th Annual Feeders' Day
will be held at the University of
Alberta Farm on Saturday May 27,
with a full day's program. There
will be a presentation and discussion
of the livestock experimental work
of the past year. The University
extends an invitation to all interested
to be present.

Withdraw His Vote.

The following story travelled from
Parliament Hill to the Lethbridge
Herald:

That famous 'Paddy' Nolan once
ran for a Southern Alberta constitu-
ency and in the town of Gleichen
received exactly one vote, according
to one of the favorite yarns of Sena-
tor W. A. Buchanan, who knew the
Calgary barrister and wit well in the
old days.

Some time afterwards 'Paddy' was
in Gleichen on a legal case and visit-
ed the local bar for a drink. While
he was sipping at his beer a citizen
entered and after looking around
asked the bartender in an audible
tone who the stranger was.

"That's Paddy Nolan," responded
the bartender.

"Not him as ran in the election?"
"The same," returned the dispenser
of drink.

"Well, well, I voted for that
man," remarked the citizen with
some wonder.

"Paddy," who had overheard this
exchange could not restrain his
curiosity at this stage and approach-
ed the citizen.

"Excuse me," he began, "but I
couldn't help overhearing what you
said. Do you mind telling me this:
Why did you vote for me?"

"Sure I'll tell you," came back
the Gleichenite. "Reason was, I
saw the other two candidates." Then
after a reflective puff on his
pipe he added, "If I'd 'a seen you I
wouldn't 'a voted at all."

"BUY IN DIDSBUY"

Automobile Financial Responsibility Act Effective June 1st

Synopsis of Certain Sections of
Revised Act, re Financial
Responsibility of Owners
and Drivers.

"Failure of a Driver or Owner of
an Automobile to pay a judgment
rendered by any court in Canada for
damages causing the death of or
injury to any person or on ac-
count of damage to any property in
excess of \$100.00 caused by the
operation of a motor vehicle results
in the cancellation of the licenses of
those held responsible until the
judgment is settled, and evidence
furnished to the Minister that such
owner or driver carries adequate
insurance or is otherwise in a position
to promptly pay any future damage
sustained or damage to the public by
the operation of a motor vehicle.
Evidence of financial responsibility
shall be as follows:

- "1. A written certificate or cer-
tificate of insurance com-
pany that has issued a policy
to such owner or driver.
- "2. A bond from a guaranty in-
surance or surety company
duly authorized to carry on
business in the province, the
bond to be made payable to the
Provincial Treasurer.
- "3. Certificate of the Provincial
Treasurer that such owner
or driver has deposited a
sum or security for money
in the amount or value of
\$11,000.00 for each motor
vehicle registered in the name
of such person.

"Any owner or driver who has
been involved in an accident and
who has failed to satisfy a judgment
for damages recovered against him
must lose his license until he pays
that judgment and satisfies the
Minister that he is financially respon-
sible for future accidents to the an-
amount of \$1,000.00 property damage
and \$5,000.00 damage to one person,
or \$10,000.00 to all persons injured
in an accident."

Settlement Celebrates Anniversary.

The famous Bar Colony, of the
Lloydminster district celebrates its
30th anniversary this year. The
colony originally consisted of 2,000
Britishers who came out and located
on homestead lands in the district
now centring upon the town of
Lloydminster and known as one of
the best farming districts in the
west. The colonists had to tick the
distance overland from Saskatoon
to their locations.

Important Notice to Automobile Owners

In another column of this paper you will read a
Synopsis of the Revised Act dealing with the Financial
Responsibility of Car Owners and Drivers. For full

THREW AWAY HIS STICK

When Sciatica Yielded to Kruschen

There can be no doubt that this man has inched walking with a stick for it is now four years since he discarded it.

He writes: "For 18 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths, cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischiefous uric acid is then given no chance to collect.

HEART OF THE NORTH

CHAPTER IX. Continued.

"I've been awake four or five days and nights—that's what! Not a wink! Didn't dare sleep. It made me sweat! Didn't think of you lighting down over there and getting nailed. I had to draw your attention somehow when you were over the lake; and it had to be one whooper of a signal, that far away. I got a couple big piles of hunch paper ready and had a drum or gas handy to seek it with; and I kept a drywood fire going so's I could stand back and throw a blazing blunk at the paper. But it made the signal, all right. It nearly singed me and I stood thirty feet back."

"I'll vow it made a signal," Buzzard commented. "It looked like the reclamation of Lens."

"I had to stay awake every minute," Bill continued. "For fear you'd see the right into the trap. And when I had to guard the Smokey, He's been up back there; didn't dare turn his nose loose, or he'd told Haskell where I was. If I'd ever got started dozing, I'd have beaten this Rip Winkle before long—high distance—please. There was times when I got so near overpowered I had to wade out and set in a rock with the water up under my chin, where I didn't dare go to sleep or I'd been drowned."

Merely by looking at Bill, Alan knew that his former partner had left half his story untold. It was only afterwards that he heard all the details of Bill's heroic struggle.

"How about Joyce?" he asked. "You've been to see her, Bill?"

"I ducked aside twice. Last time was a week ago. She's taken in a big raft of peltry. She's closing up the place to go out to Edmonton and be with her dad."

"A week ago," Alan thought. "Any-thing could have happened in a

W. N. 11, 1901

week." He asked. "Any news at Edmonton?"

"Just everyday things," Bill reported. "Except for Larry, Larry would cry, Bill said, whenever he looked at his shattered leg. Larry, who kept himself as young as men half his age, who prided himself on his wolf-like body, he was wasted away to a mere shadow of his former self."

Glancing out across En Traversé, Alan suggested: "We'd better be leaving here. Haskell and his stool pigeon over there probably saw us light. They may take a notion to whip across the lake after us. Where's the oil and gas, Bill?"

"Right on by that rock jubilee. The Smokey is just this side. I'll go along."

"You stay here; you're about once in. Buzzard, you turn the 'plane and make ready for a quick getaway in case that launch shows up. I'll get the drums."

He hurried to the tangle of jumpers and granite boulders where he found the precious gas and oil which Bill had sworn to bring to the rendezvous. Taking a load out to the plane, Alan hoisted it up to Buzzard, who began slipping into the wing tank.

With an anxious inquiry in his bloodshot eyes, Bill asked:

"Say, Alan, why can't I go along on this trick? I'd give a leg to be. I'm a w. o. l. now. Haskell can't do much worse to me than he intends to do as it is."

After all that Bill had done for them, Alan hadn't the heart to refuse him. He asked Featherfoot:

"How about it—can we carry a third person?"

"Well, we maybe could. But I wouldn't like it. I'd cut down our gas load, and this is only a two-place 'plane'."

"Then I'll not go," Bill agreed sturdily. "Don't want to be a drag. I'll sleep off my dry-gig here and then money in to Edmonton."

Alan went after two more drums. As he reached the plant with them, his ears caught a faint low drone barely audible far off upon En Traversé. Standing up on the cockpit edge, he turned his glasses north.

Six miles out, the powerful scarlet-and-gold launch was heaving straight toward them.

"Knock off on that!" he jabbed at Buzzard. "We've got to get gone. They'll ram us, or shoot at us from protection of the launch. You've got enough in the tank to take us to the Alooska. We'll slow these drums aboard, and what we can't take we'll leave here on this headlight. Can get it later."

Under Buzzard's directions they worked frantically. When they were ready, when Bill clambered down into the canoe and held out his hand in good-bye, Alan was struck to the heart by the pleading, unspoken prayer which Bill stoutly refused to word.

"Buzzard!" He jerked around to his partner. "Bill's got to go along! D—d if I can leave him out in the cold! I simply can't do it."

"Then try to wedge him in with you. We'll carry him, if we have to tie him on!"

Alan pulled him up. Bill managed to squeeze into the tiny one-place compartment, and by that act deserted the Mounted Police.

With the big boat only a mile out, Buzzard taxed the 'plane and headed it parallel to the shore line. It seemed to Alan that the White Speeder, heavily laden with gas and oil and a third man, would never rise from the water. It taxied nearly a half-mile before it began snaking the waves.

The police boat swerved right and diagonaled in to cut across its course. White puffs of smoke were bursting from a rifle in the prow, from a rifle in the hands of George Haskell.

But when the 'plane finally did take hold of the air, it left the boat behind in a twinkling, roaring out of range, its sooty wings into the north-east, toward its goal on the Big Alooska.

CHAPTER X.

The Secret of Many Wastes

Two miles down river Buzzard throttled the motor, eased the stick forward and glided expertly down and down into that difficult narrow lane of congested rapids.

Alan started to get out the canvas canoe to tow the 'plane in to the landing; but Joyce, understanding, un-

for CORNS & WARTS

thier father's sturdier craft, laid in an extra paddle, and came skirting out toward them.

As Alan clambered down upon a float and waited, he remembered his decision to tell Joyce what had happened within him since he saw her last, and to tell her of that inexorable circumstance which had led to his engagement to Elizabeth. Easy that decision then, but he wavered now. Did he dare tell her that? If it was useless, if she had put him out of her life, did he dare resurrect all the poignant memories and intimacies between them? Today he would find out how she regarded him; today she would surely give him some clear token.

Reaching out, he caught the prow of her canoe. Joyce rose and stepped up. . . . In another instant he was clasping her hand.

"Joyce! Joyce! I was afraid for you—here alone, girl. I can't tell you how glad—when I saw you. . . . And glad to be back here."

As their eyes met, as Alan felt her small hand warm in his, he was torn between fear. In that first moment of their meeting, when impressions stood out so sharp and clear, it seemed that all passion had gone out of Joyce's manner toward him. She greeted him warmly, she was friendly, even cordial, but in the same way as she would have met Bill Hardcock or Pedneault or Larry.

Buzzard Kept Glancing at Her, Studying Her Intently.

Introducing her to Buzzard, he stepped down into the canoe, lapped the painter rope around a strut; and together he and she guided the 'plane against current to the landing. After mooring it securely and getting part of their personal stuff, the four of them, with old Pence appointing himself guard over the machine, went up the path to the trading store.

Alan could fairly feel the dozen eager questions Joyce wanted to ask him. Who was this new-found friend whom he called Buzzard? Where had they got this 'plane? How did they intend to use it against those bandits? But practical life soul as always, she asked no questions. The three men, tired and hungry and desperately in need of rest, were her first consideration. Going back to the kitchen she heated them water to wash and shave, and set about getting a hot substantial meal.

Alan happened to notice that his picture, which for two years had

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel better and happy, your liver must be healthy. Liver is the most important organ in your body. Without that bile, food can't be digested. Bile is the key to the door of the body. General weakness, loss of energy, indigestion, constipation, headache, dizziness, nervousness, all these are signs of a weak liver.

Alan used Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Insist on genuine. No other pills like it.

stood on Joyce's dresser, was not there now. It halted him like a blow. Why had she taken it down? Was it some accident, entirely innocent? Or . . .

Back in the kitchen, while Buzzard was outside washing away the grime and oil of five days' flight, he remembered the centure fleecie and found it and brought it to Joyce.

"I thought of you, out in Edmonton," he said awkwardly, breaking the string. "I believed you might like this, Joyce. It isn't much, but I was short of . . . I was pretty near broke."

As Joyce unfolded the sun-belt and saw its exquisite beauty, an admiration leaped into her eyes. "Oh, it's beautiful! It's the loveliest I've ever seen anywhere."

But then, as she looked from the gift to the giver, something seemed to check her. With an effort she forced herself to say quietly: "It was kind of you, Alan, to think of me."

Alan turned away to bitter disappointment. "It was kind of you. . . . How cold and distant those words sounded. She was talking to him across an abyss."

When Buzzard and he came back in, they sat down to their meal. As he passed them food and the three of them talked, Alan could not help noting Buzzard's quick ardent admiration of Joyce. Buzzard kept glancing at her, studying her intently, evidently astonished to find a pretty, well-educated girl like her living almost alone here in this far-northern wilderness.

Later, when Joyce had insisted on their getting a few hours rest and had left them in her father's room, he remarked:

(To Be Continued.)

Picture Is Changed

Heavy Movement From Farms To Cities In Past Sixty Years

How great the movement toward the city has been in Canada in recent years is revealed by the Dominion census covering the period from Confederation in 1867 to the census of 1931.

At the time of the Dominion census in 1871 the population of Canada was 3,443,000. Of this, 1,847,728 were in rural Canada and 1,595,272 in urban centers. Expressed in percentages this means 53.3 rural and 46.7 urban.

In these sixty years the entire picture of Canadian life has changed. In 1871 there were 81 persons out of every hundred living in the country; while in 1931 there were nearly 54 out of every hundred in the cities and towns.

Even these figures, impressive though they are, do not disclose the whole story for the reason that persons living in small communities and unincorporated villages are recorded as rural dwellers. Actually, according to figures compiled by the Canadian Government Bureau of Statistics, only 31.7 of the whole population of Canada live on farms. There is, however, a noticeable return movement toward the farms now in progress.

THE RHYMING OPTIMIST

By Aline Michaels

A CHILDLIKE HEART

Have you the gift of a childlike heart? Then you are blessed indeed! In every gladness it plays its part. Or every joy it is sweet!

For a childlike heart has such faith and trust; That it questions not at all; But takes as a portion wholly just Whatever may befall.

It can see the wonder in common things. Both distant and near at hand. The pledge where the arc of the rainbow strings. The promise of sun-swept land.

It beholds a beauty that grows not less. In the light of life's ageing face. And finds charm that with passing years express. New miracles of grace.

O, pray for the gift of a childlike heart. Which makes all things fair and true. For every gladness it can impart. Bringing heaven on earth to you.

SPEED!

Time counts when you're in pain! Aspirin is the only for its safety but fair its speed.

Aspirin tablets dissolve at once. They are many minutes faster than remedies that are offered in their stead.

If you saw Aspirin made, you would know why it has such uniform, dependable action. If you have ever timed it, you know that it dissolves and gets to work before a slower tablet has any effect.

Stick to Aspirin. You know what you are taking. You know what it does; nothing in these tablets to depress the heart. You know you will get results. For headaches, colds, neuralgia, rheumatism, the safe and certain relief is—Aspirin.

ASPIRIN

Trade-mark Reg.

Little Helps For This Week

"So teach us to number our days, that we may apply our hearts unto wisdom."—Psalm 90:12.

Our days are numbered; let us spare Our anxious hearts a needless care: 'Tis Time to number out our days; 'Tis ours to give them to Thy praise.

Every day let us renew the consecration to God's service, every day let us in His strength, pledge ourselves afresh to do His will, even in the veriest trifles, and to turn aside from anything that may displease Him. Leave the future in His hands, sure that He can care for it better than we—Anon.

Finish the day and be done with it. You have done what you could. Some blunders and absurdities no doubt crept in; forget them as soon as you can. Tomorrow is a new day; begin it well and serenely and with too high a spirit to be cumbered with your old mistakes. This day is all that is good and fair. It is too dear with its hopes and privileges to waste a moment on the yesterdays.—E. W. Emerson

Still In the Lead

No Other County Equals Great Britain in Aviation

For obvious reasons we in Canada bear and read a good deal about United States airplanes, American flyers, their exploits and achievements. Actually no country in the world has approached the intensive study of planes and their possibilities given by the United Kingdom; no country has gone farther, or as far, in developing the factors of speed, safety, and general utilization of aircraft; and in no land are there air pilots superior to those of the United Kingdom in experience, capability, and ingenuity.—Ottawa Journal.

The real need of the farmer, as Shakespeare or somebody else used to say, is a better price per cow, per hen, per sheep, per hog, per acre and per fater.

Burnside Notes.

Mr. Fred Metz spent Sunday with Mr. Jim Dundas.

Miss Dorothy Cipperley spent Sunday at her home here.

Mr. and Mrs. David Thoman and family spent Sunday in Calgary.

Mr. Robert Eckel spent Sunday evening with Mr. Jack Owens.

Mr. Percy Saunders, our local Councillor spent Saturday at Olds attending a council meeting.

Messrs. Leon Dell and Sam McAllister spent Sunday with Mr. and Mrs. C. L. Cipperley.

Mr. and Mrs. Wm. Dyck and family spent Sunday with Mr. and Mrs. Arthur Jenkins.

Miss Tena McLean, of the staff of the Ponoka Mental Hospital, arrived home Sunday for a few days' holiday.

Mr. and Mrs. Chris Ehret and family spent the weekend at Calgary and Turner Valley.

Mr. George Featherington, of Calgary spent Friday with Mr. George Metz.

Mr. and Mrs. George Holeton, of Olds spent Sunday with Mr. and Mrs. C. L. Cipperley.

Mrs. Hugh McLean and daughters Tena and Sadie spent Monday with Mrs. Jake Brown and family.

Messrs. George Metz and Howard Dedels spent Sunday with relatives in Didsbury.

Mr. and Mrs. Monroe Findlay and son Luther, and Miss Reba Williams spent Sunday with Mr. and Mrs. Bert Pross.

We understand there is to be a competition among some of our young men in the very near future to see who can build the best concrete doorstep.

Mrs. B. Woods and Mrs. Bert White are attending the annual W.I. convention at Calgary this week, the former as delegate for the Lone Pine W.I.

Mr. and Mrs. Chas. Mardon celebrated their silver wedding anniversary with a turkey dinner Sunday last. The following guests were present: Mr. and Mrs. Pearson, Carstairs, Mr. and Mrs. Wm. McCoy, Misses Marie and Edith Chambers, Mr. J. D. Thomas, Mrs. J. H. Lowrie and daughter Amy, Capt. and Mrs. Page, Mr. and Mrs. W. Shultz and daughter Louise, Mr. Shultz, Sr. Mr. and Mrs. Albert Ardenison and Mr. and Mrs. Norman Howles.

The Lone Pine W.I. met at the home of Mrs. Chas. Mardon on Thursday last. It was decided to hold a dance May 24th, but no picnic, as the seeding season was so late. The date for the picnic will be decided later, and the drawing for the prizes will be held the same time as the picnic. The next meeting will be held June 8th at the home of Mrs. Wm. Lyons. A presentation was made to Mrs. Mardon in honor of her silver wedding anniversary, a report of which appears in another column.

WEEKLY SERMONETTE

"You can't carve your way to success with cutting remarks."

Seen and Heard Around Westcott

That wedding bells are ringing in the distance.

Lloyd's car simply refuses to go east, but works fine going west.

Emor Tugale and family spent Sunday at the Hughes's.

Mrs. Stanley Maylor is spending a few weeks with her parents.

Mr. and Mrs. Ira Levaagood were entertaining relatives from Calgary on Sunday.

Norman says the paddles for his John Deere are finished and are very successful.

That Blanche is going strong in the chicken business. We imagine that chicken prices will go "flunk."

Tomey Hunter has been at Innisfail for the past few days, having his stomach relined. If this is not successful it's too bad for Tomey.

LOCAL & GENERAL

Don't forget the dance at Lone Pine Hall on the 24th of May.

Nick Nowak was a business visitor in Calgary this week.

To Clear—Eleven Knitted Suits at \$9.95. Values to \$14.95 in the lot.—Mrs. Wilson, Main St.

Mr. and Mrs. W. Hardy, George and Harold Hardy motored to Edmonton over the weekend.

Attention!—A Novelty Pet Show will be held here from 10 to 11 a.m. Saturday May 27th. Everyone owning a pet be sure to bring it. A prize will be given the best pet. Entry fee 10c. Watch for further announcements.

Clark Gable, with Carole Lombard and Dorothy Mackall in "No Man of Her Own," at the Opera House next Thursday only. He married her—on the flip of a coin. They knew nothing of each other. She wanted love—he wanted her. And then they found out what each was.

Special attraction at the Didsbury Opera House, Monday only May 22. The reigning triumph of London, Paris, Berlin, with Renate Muller, Jack Hulbert and Owen Nares. Laugh your way through life with "Sunshine Susie." Tunesful songs, joyful romance, uproarious fun!

She made men and ruined women! She made a name for herself in "Frisco"—and "Frisco" made a name for her! She broke all of the ten commandments and if they'd made another one she'd have had a crack at that! See Ruth Chatterton in "Frisco Jenny" at the Opera House (Thursday) at 8:15.

KNOX UNITED CHURCH NOTES

The Minister will conduct service (D.V.) at Westcott on Sunday next May 21st at 2:15 p.m.

The sermon subject for Sunday evening at Knox United Church will be the last of the "Sermon on the Mount" series.

A sacred play entitled "The Gift" will be given by the Young People's Society of Knox United Church on Sunday May 28th, at Westcott 2:15 p.m. and at Knox Church 7:30 p.m.

WEEKLY JOKE

North (commercially inclined): "How'd you spend your income?"

West: "About 30 per cent for shelter, 30 per cent for clothing, 40 per cent for food and 20 per cent for amusement."

North: "But that adds up to 120 per cent!"

West: "That's right."
